

Come on over!

Firefly Protection Project

In Shiga, Japan

Let's play with insects and fish!

Would you like to play in the river?

We live in Shiga, Japan.
Shiga has Lake Biwa, the
largest lake in Japan.

We are Meta Riv.Ranger!

We love insects! We love rivers! These children are cleaning and protecting the rivers for fireflies and insects.

The river is fun.!

We learned from the activities and then we made a newspaper. The newspaper won the grand prize in the competition.

Would you like to join us in protecting the fireflies and many other insects of Meta River?

We investigated the creatures together with the experts.
